## Career Objective

Motivated Computer Science Engineering graduate trained in Python Full Stack Development, looking for a beginner-level opportunity to start my career. I aim to use my basic programming knowledge, strong learning ability, and dedication to support the organization while improving my technical skills.

## Technical Skills

Frontend: HTML, CSS, JavaScript, React.js, Bootstrap  
Backend: Python, Django  
Mobile Development: Flutter, Dart, Android Studio  
Cloud & Database: Firebase  
Tools: GitHub, VS Code, Figma, Canva  
Core Areas: Front-End Development, Back-End Development

## Projects

|                                                                                                                                                                                                                                                                                                                                                                                                     |          |
